GLASS PENDANT LIGHT
REFLECTION GLOBE

The visual attractiveness of the glass instantly catches the eye. This first impression must be completed with the story of its creation. The molten glass is first punctured by a craftsman, and then hand blown until it reaches its full shape. No two Reflection Globes are the same.

The charm of this lamp is enhanced even further by the light it casts, which gently shimmers creating intriguing shadows.

product category	environment	material	voltage	light source
pendant lamp	indoor	clear glass and solid brass	230 v - 50Hz	E27 max 25W
